

University of Wisconsin - River Falls
Art Department presents

Polymorphic Membranes
an installation by
Trever Nicholas

October 5-28, 2011

Reception and Artist Talk
Wednesday, October 5, 3:30-5:30 pm

The geometry of milk bubbles and the presence of large, fluffy, cumulus clouds lay the groundwork for the construction of "Polymorphic Membranes." The image is a model for the creation of a large, Mylar, polyhedron-like cluster of floating bubbles.
