

Acknowledgments

The Gypsy Moth Learning Activities have been developed through the efforts of many people and organizations. As a result of a workshop in July 1998, participants got ideas and information from DNR, DATCP, DPI, U.S. Forest Service and UW-RF staff and developed the initial learning activity drafts. The workshop participants included:

Rita Arcand-Greshik, Ag Ed Instructor, Arcadia
Jennifer Hintz, Ag Ed Instructor, Sparta
Brent Richter, Ag Ed Instructor, Mineral Point
Jeff Pickerign, Ag Ed Instructor, Menomonie
Don Mier, Ag Ed Instructor, Plymouth
Alan Brooks, Ag Ed Instructor, Valders
Jenifer Erb, Ag Ed Instructor, Waupaca
Dan Robinson, Ag Ed Instructor, Lomira
Mark Boxrud, Ag Ed Instructor, Mora, MN
Kim Pruss, Ag Ed Instructor, Oshkosh
Genny Fannucchi, DNR
Teri Heyer, US Forest Service

The projects was assisted through a joint effort between the Wisconsin Department of Natural Resources, United State Forest Service, the University of Wisconsin System and the Wisconsin Department of Agriculture, Trace and Consumer Projection. Several people reviewed the draft learning activities which included: Andrea Deiss, DNR; Dave Schumacher, DATCP; Al Strenstrup, DPI; Genny Fannucchi, DNR; and Teri Heyer, US Forest Service.

The following teachers and schools assisted with field testing. Joan Bennett, Park High School, Racine, WI; Lee Beuscher, Watertown High School, Watertown, WI; Kevin Jarek, Seymour High School, Seymour, WI; Terrence McConnell, Whitehall High School, Whitehall, WI; Cheryl Moetel, Century High School, Rochester, MN; Rita Arcand-Greshik, Arcadia High School, Arcadia, WI; Mark Boxrud, Mora High School, Mora, MN; Jenifer Erb, Waupaca High School, Waupaca, WI; Jennifer Hintz, Sparta High School, Sparta, WI; Jeff Pickerign, Menomonie High School, Menomonie, WI; and Kim Pruss, Oshkosh West High School, Oshkosh, WI.

The Gypsy Moth Learning Activities Project was funded by Wisconsin DNR and the USDA Forest Service. The project is the result of a recommendation from an interagency committee on Gypsy Moth education and outreach. The Wisconsin agencies involved with the committee include DNR, DATCP, UW-Extension, UW-Madison and DPI, plus USDA Forest Service. Members of the committee assisted with the project by reviewing and editing the draft copies. Students from UW-River Falls assisted with editing, computer input and field testing administration and included Laura Heiden, Bridget Finke, Kristin Hanson, William Beuthin and Greg Symanietz. UW-River Falls staff participating on the project was Fay Westberg, Program Assistant, Agricultural Education Department. The combined talents and assistance were vital to the completion of the learning activities.
