What Our Graduates Say

“The most beneficial part was the opportunity to apply what I was learning to fields I was interested in.”
- Chris Lebo, Sustainable Management Graduate

“My degree makes me eligible for higher level jobs and my experience makes me desirable to employers.”
- Teresa Kosmas, Adult Degree Completion Graduate

“As a busy wife and mother, I still wanted to be able to take care of the things at home and go to school at the same time...this program allowed me to do just that.”
- Kris Greener, Health and Wellness Management Graduate

“I don’t know if I would have been able to earn my degree if it were not for this program. The program was obviously designed to meet the needs of a nontraditional/distance learner and it works.”
- Jurita M. Foltyn, Early Childhood Graduate

Degree Completion Features
• Apply previous college credits toward your degree.
• Take classes full time or part time
• Begin your program of study at any term: fall, winter, spring or summer.

Contact a program representative today for a transcript review and consultation.

The University of Wisconsin-River Falls offers undergraduate degrees in more than 50 fields of study, with select bachelor’s degree completion programs designed to meet the needs of working adults.

UNIVERSITY OF WISCONSIN River Falls

Fit college into your schedule. UW-River Falls makes it possible.
Applied Computing

Fully Online Program

As technology continues to expand into every field and industry, from environment to education to politics, the market for skilled hands-on technicians grows increasingly competitive.

Students will:

• perform programming, software engineering, graphic applications, networking, and operating systems management in a variety of environments;
• demonstrate power skills such as business communications, ethics, and project management;
• solve real-world business problems through the application of technology;
• develop a deeper focus on fundamental computer science, software engineering, tech security issues, computing solutions for business problems, and data management.

Business Administration

Sharpen your business acumen and be positioned to advance in a business or management career with this degree plan, also known as the Adult Degree Completion program.

Students will:

• receive personalized advising and course planning and priority registration to ensure you get a schedule that aligns with other responsibilities in your life;
• take courses in management, economics, accounting, finance and others; and
• attend courses at the conveniently located and adult-focused education center in Hudson, Wisconsin one evening per week over a seven or eight week period or throughout the term.

For More Information Michael Bilden 715-425-0697 • adc@uwrf.edu www.uwrf.edu/ADC

Geographic Information Science

Individuals who have associate’s degrees in geographic information sciences or a related area may now continue their education to obtain a bachelor’s degree and improve their career options.

Students will:

• learn about geospatial theory and literature that drives data collection, storage, analysis and mapping;
• build proficiency in the use of state-of-the-art GISci technologies including GISci and Remote Sensing software applications, GPS and GISci data collection, data analysis, web mapping and digital image processing, among others;
• complete a degree or certificate.
