Several qualifications are considered assets for hire either as an instructional/academic staff or tenure-track faculty member in the Agricultural Engineering program at the University of Wisconsin–River Falls.

Candidates for undergraduate faculty status have earned a Ph.D. degree in Agricultural Engineering, Biological Engineering, or a closely related engineering field from an ABET accredited institution.

Agricultural Engineering faculty need no further record of research, scholarship, or achievement.

According to the Higher Learning Commission, “faculty teaching in undergraduate programs should hold a degree at least one level above that of the program in which they are teaching” (e.g. at least a master’s degree or equivalent). All full-time faculty in the Agricultural Engineering program hold this degree level.

Qualified applicants who are approved using “tested experience” should also have 18 credits of graduate work in the disciplinary area, and/or other skills, experiences, credentials, and so on.
