Department: Geography and Geographic Information Science

Program Name: Geography

Program Level: Undergraduate

College: Arts and Sciences

Program: Major

Submitted by: Charles Rader

Title: Professor

Contact: charles.p.rader@uwrf.edu

Submission Date: December 22, 2017

Program Outcomes

Outcome 1: Identify, describe, and analyze relationships between people and their physical and cultural environments.

Outcome 2: Identify, describe, and analyze regional variation and interdependence throughout the world.

Outcome 3: Explain and summarize the interdisciplinary nature of geography.

Outcome 4: Identify and describe appropriate uses of basic mapping techniques and explain the power of mapping as a communication tool.

Outcome 5: Design and produce a map for a specific purpose using appropriate cartographic techniques.

Outcome 6: Select, assess (evaluate) and analyze spatial data for geographic problem solving.

Outcome 7: Communicate effectively in written, oral and graphic forms.

Outcome 8: Integrate the knowledge and skills of the discipline of geography into the design, analysis, and completion of an independent research project.

Outcome 9: Evaluate the spatial and integrative way of thinking that provides a framework for dealing successfully with geographic problems.
