Submission Date: January 24, 2018

Program Outcomes

Outcome 1: Sustainability ethics: students will gain a grounding in the interrelated nature of social, economic, and environmental issues, as related to views of interdependence, resource allocation, and environmental justice.

Outcome 2: Sustainability praxis: students will be able to analyze, articulate, and envision solutions to problems of sustainability, integrating knowledge data across disciplinary boundaries.

Outcome 3: Global citizenship: students will internalize an understanding of the consequences of their social, economic, and environmental choices, and the possibilities for taking action on the personal and public levels.
