The following is a summary of work that we currently anticipate in the coming week. This is subject to change due to the many unpredictable factors involved in a project of this magnitude and complexity.

- **Roundabouts** – Installation of concrete foundations for bollards at Second Street roundabout has been completed and installation of the bollards themselves is continuing. Pavers are being installed in the areas around the bollards. Delivery of cap blocks for the roundabout walls is scheduled for the 3rd week in October.

- **Asphalt paving** – Final paving of Cascade Avenue is scheduled for this week. Painting of lines is scheduled for the following week.

- **Lighting** – Street lights poles that were delivered have a defective finish and have been rejected. The poles will be removed and returned to the manufacturer to be refinished in two shipments. The first batch of poles will be returned this week and should be returned in two weeks. The second batch of poles will trail the first by one-week. All street light poles are expected to be removed, refinished and reinstalled by November 2, 2012.

- **Signage** – Most signage has been installed.

- **Plants** – Plants installation is complete.

- **Mulching** – Mulching of median and roundabout planting areas is complete.

- **Misc.** – Punch list work will continue.

- **Ribbon Cutting** - A ribbon cutting ceremony is being planned for Friday, October 12, 2012, at 11:00 a.m. on the lawn in front of South Hall. In case of rain, the ribbon cutting will be held in room 210 South Hall. Refreshments will be offered. This will be a low key celebration to recognize and thank everyone that was involved in the effort that went into making this project a success. It took many years of planning, hard work, and cooperation between the Wisconsin Department of Transportation, the University of Wisconsin-River Falls, the City of River Falls and the community in order to reach this point. Project managers will be available following the ceremony to answer any project related questions.

- **6th St. Retaining Wall** – A fence and landscaping will be installed at this retaining wall.
