The following is a summary of work that we currently anticipate in the coming week. This is subject to change due to the many unpredictable factors involved in a project of this magnitude and complexity.

- **Roundabouts** – Installation of bollards has been completed. Pavers at bollard area on south side of Second Street roundabout will be completed. Delivery and installation of cap blocks for the roundabout walls is scheduled for next week.

- **Asphalt paving** – Asphalt paving is complete.

- **Lighting** – Defectively finished street light poles were returned to the finisher in Indianapolis. It has been determined that it was not possible to properly refinish the poles. Due to the long lead time for new poles to be made, the defective poles will be returned and installed as temporary lights. Poles should arrive next week and reinstallation will begin. All temporary street light poles are expected to be reinstalled by November 2, 2012.

- **Signage** – Street Name signs may be installed this week.

- **Misc.** – Punch list work will continue.

- **Painting** – Painting of the street at the roundabouts and in the area of Cascade Avenue and Main Street was cancelled twice this past week due to wet pavement. It is currently scheduled for Saturday, October 20.

- **Roundabout Signage/Artwork** – UW-RF signage and artwork for the two roundabouts can be installed after the cap blocks have been placed.

- **6th St. Retaining Wall** – A fence and landscaping is being installed at this retaining wall.

- **East Cascade Avenue Parking** – Please pay attention to upcoming changes to the temporary parking area that was created on the south side of East Cascade Avenue between Oak Knoll and Wild Rose. The 90 degree parking will revert back to parallel parking when the road reopens to through traffic.
