The concept is similar to the concept to close Cascade Avenue for one block between 3\textsuperscript{rd} and 4\textsuperscript{th} Streets. Most of the comments for the one block closure can be used for this concept. Refer to that discussion paper for more information.

With multiple closures, traffic movement in the corridor will be more difficult, alternate routes could be reduced, volumes on residential streets will increase, and directions for facilities will become even more difficult.

Concept 1B – 9/5/07
