Rev. 11/08
Narrative for change in directed electives list for Conservation Major

Last year we submitted a change to SOIL 350 – Pedology, a course taught in the Plant and Earth Science Department. The changes were approved by all appropriate university committees and have been implemented into our course offerings. The change split the material for the 4-credit SOIL 350 course into two 2-credit courses SOIL 250 – Soil Profile Descriptions ... and SOIL 350 – Soil Development .... It is now time to make the adjustments in terms of our curricular listings to reflect that change.

The Conservation Major in our department lists SOIL 350 in the list of courses accepted as directed electives. We propose that both SOIL 250 and SOIL 350 be listed as acceptable directed electives for this major.

I have attached lists of the current directed electives list and the proposed new list of directed electives for the Conservation Major.
