Executive Summary

During Academic Day, September 3, 2013, incoming freshman and transfer students in the College of Agriculture, Food and Environmental Sciences (CAFES) were asked to complete a one-page survey to find out:

- How they found out about UW-River Falls as an educational institution
- What factors influenced their decision to come here
- What sort of contact they had with the university prior to their arrival
- What their current expectations are for their time at UW-River Falls (i.e. their commitment to their major, likelihood of participating in an international experience, etc.)

A small amount of demographic information was also collected, including the state the students are from and whether or not they grew up on a farm. This report is provided as a summary for the 305 surveys that were completed and returned. The survey response frequencies can be found in Appendix A.

When the survey first started, in 2007, 54% of the CAFES students stated they grew up on a farm. In 2013, 52% were from a farm and only one-quarter of students are the first in their family to attend college.

Once again, word of mouth is the major means we attract students to CAFES. Of those who responded, 65% reported that their family and friends were the most important sources of information. The most influential factor in their decision to attend UW-River Falls was our reputation and quality of programs, 46% listed this as their most influential factor, while 23% listed the size of campus as the most influential factor.

An open-ended question was also included to see what sources of information influenced their opinions about the quality of UW-River Falls programs. One-third of the respondents said that family, friends, and alumni helped them form their opinions. Nearly twelve percent of students reported that the University of Wisconsin-River Falls website was also influential in forming their opinions. Other influences came from high school teachers, counselors, and vocational agriculture teachers and faculty, staff, and other students (11%).

The University of Wisconsin-River Falls continues to be effective in sharing information about the University with prospective students. A majority of students have visited our website (54%), received our mailings (62%), and participated in campus visits (74%). Only 9 out of 305 students stated they had accessed CAFES’ Facebook page.

UW-River Falls was the first choice in colleges for the majority of the incoming class, 85% of students agreed or strongly agreed with this statement. In addition, approximately eight in ten students agreed or strongly agreed that they plan to stick with their current major.
The Background of CAFES 2013 Entering Class:

This is the seventh year that the SRC has conducted the New CAFES Student Survey for incoming students. As was true in the previous six years, CAFES students come from a variety of backgrounds and are more likely to come from Wisconsin than Minnesota.

Slightly more than half of all students (52%) stated that they grew up on a farm in 2013. As Figure 1 illustrates, 2013 is the first year since 2009 in which more than half of CAFES new students came from farms. The fact that 48% of the entering class is from a non-farm background demonstrates the appeal of CAFES majors to a more diverse set of students.

Two-thirds (66%) of the CAFES students reported that they were from Wisconsin. Slightly more than one-third (34%) of all students in CAFES are from Minnesota. These results are similar to the previous new student results.

This year, one-quarter of students (25%) reported that they were the first in their family to attend college. Since 2007, the proportion of entering students who report being the first in their family to go to college has consistently been between 20 percent and 30 percent. This is substantially lower than for the University as a whole; roughly half of all UWRF students are the first in their family to go to college.

Figure 1: Percent CAFES Entering Class from Farms

![Graph showing percent CAFES entering class from farms from 2007 to 2013](image-url)
Figure 2 provides a breakdown of the majors of the 305 students entering CAFES who turned in a questionnaire in 2013, compared to 353 in 2012, 246 in 2011, 246 in 2010, 289 in 2009, 310 new students in 2008, and 190 new students in 2007. Animal Science continues to be the largest major for incoming students and is responsible for more than one-third of all new students. The other majors in the college have either had somewhat erratic enrollment numbers (e.g. enrollments in ag business, environmental science, and ag engineering show neither a consistent upward nor a consistent downward pattern) or are showing a slight decline in numbers (ag horticulture). The dominance of animal science in the college is somewhat problematic from a risk management perspective because most of the college’s “eggs are in one basket.” Ag studies makes up 10% of the majors in “other” but none of the other majors (environmental science, ag studies, conservation, etc.) represent more than 5% of the entering class’ majors.
Figure 3 shows that within the animal and food science department, the number of majors for animal science is 36% of all entering students, and dairy science showed another slight increase in enrollment. Within the animal science major, most of the growth over the last few years is accounted for by the equine and pre-vet programs. In short, there is risk to the college from the preponderance of majors in one program and this may be amplified if most of those majors are in one or two emphases within the major.

Figure 4 tracks the proportion of the entering classes between 2007 and 2013 who were in programs in the Plant and Earth Science Department. Enrollments in these majors has been fairly volatile over this period but there is a downward trend in the overall proportion of the entering class in PES majors. In 2007, PES majors were 24 percent of all entering students but have only represented 18, 18, and 16 percent in the last three years.
Finally, Figure 5 shows the proportion of entering students who completed a survey and identified themselves as being in one of the programs in the departments of agricultural economics, education or engineering. The agricultural business program has had the most dramatic swings but has a neutral overall trend line. Agricultural engineering has a slightly positive trend line. Agricultural studies, agricultural education, and marketing communications are trending downward.
How Incoming Students Learned about UW-River Falls?

Entering students were asked about eight specific means by which they might have learned about UW-River Falls, along with an “other” category. Students had the opportunity to check all boxes that were applicable. As Table 1 shows, the most frequent source of information for incoming students for all 6 years has been family and friends. The importance of family and friends appears to be declining slightly over time.

The table also indicates that between about one-quarter and one-third of incoming students learned of UW-River Falls from high school teachers or guidance counselors. This factor also seems to be trending downward.

</tr>
</tbody>
</table>

The other key trend from Table 1 is the continuing growth of the importance of electronic media (web searches) as a source of information about the University. The University/College website now seems to be about as important as our regional presence and teachers/guidance counselors as a means of learning about UW-River Falls. CAFES Facebook page has not yet become a significant source of information about this university for incoming students.
What most influenced their decision to come to UW-River Falls?

Respondents were asked to identify the single factor that most influenced their decision to come to UW-River Falls. However, many students included multiple responses; the question was analyzed as though students could choose multiple options. This results in percentages greater than 100%.

As in previous years, incoming students once again noted that the quality of our programs and our strong reputation was the most important factor in choosing UW-River Falls. In 2012, over half (52%) of students said that reputation was the most important factor in deciding to attend UW-River Falls. Over the 6 years during which data has been collected, reputation has consistently been the most influential factor noted by between 40 percent and 50 percent of new students. Our reputation is about twice as influential as the other factors summarized in Table 2.

| Table 2: Most Influential Factor in Choosing UW-River Falls |
|---------------------------------|---|---|---|---|---|---|
|                                | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 |

| Turned down by first choice    | 2%   | 3%   | 1%   | 2%   | 1%   | 1%   |
| Contact with Faculty           | 1%   | 2%   | 1%   | 2%   | 1%   | 3%   |
| CAFES Facebook Page            | NA   | NA   | NA   | NA   | 0%   | 0%   |

Table 2 also indicates that, while more students are gathering information about UW-River Falls from the website, this source of information is not particularly influential in terms of their decision to come to this university.
The Quality of UW-River Falls Programs.

Because CAFES’ reputation continues to be an influential factor in students choosing UW-River Falls, the SRC again asked the open-ended question, “What sources of information have influenced your opinions about the quality of UW-River Falls programs?” Of the 353 students who completed a survey, 315 answered this question. In addition, many respondents identified multiple sources of information that helped them form their opinion of UW-River Falls. When this was the case, the full response was put in each of its multiple categories and the phrase that corresponded to the specific category was italicized. Table 3 summarizes the respondent’s answers for 2012 and 2011, while Appendix B shows a complete listing of their answers for 2012.

The ways in which students report hearing about us are similar to the factors that most influence student’s opinions in choosing UW-River Falls. These factors include:

- Word of mouth (from family, friends, and alumni) (37% of all respondents)
- The website (18%)
- Interactions with high school counselors and vocational ag teachers (8%)
- Interactions with faculty, staff and students (14%)
- Campus visits (7%)
- Mailings (5%)
- Other factors including, class size, personal observations, general reputation, and location (10%)

Interestingly, the importance of the different categories of comments noted in Table 3 is similar in 2011 and 2012, with word of mouth being much more important than other factors in both years. These responses do not point to a specific strategy to use to continue to strengthen our reputation. Based on comments over the past two years, our reputation will likely be maintained if we:

- Cultivate close relationships with our alumni and with industry and other employers of our graduates
- Maintain strong relationships with high school teachers, vocational ag teachers, and guidance counselors
- Provide positive experiences for our current students
- Maintain a user friendly and informative website
- Continue to have a presence in statewide agricultural papers and in local and regional papers to note our achievements
What contact did incoming CAFES students have with UW-River Falls prior to their arrival?

Table 4 summarizes contact that the university had with students prior to their arrival on campus. The table shows that the university has been consistently successful in attracting students to campus visits. This year, almost four-fifths of students (78%) said they visited campus prior to their move to UW-River Falls. The consistency of the proportion of students taking part in campus visits is a positive outcome for the university and CAFES.

Slightly less than two-thirds (65%) of all students who completed the survey noted that they had visited our website. Given the earlier results of this survey, this relatively low proportion of incoming students who say they visited the university’s website is surprising. Sixty-one percent of students said they recalled receiving a mailing from the university. Mailings seem to be reaching a diminishing percentage of CAFES’ incoming students.

The average student reported having contact with the university by two and a half of the methods listed in table 4. Only 1 of the 353 student respondents reported having made no contact with the university prior to their arrival on campus, while 85 students reported 4 or more different modes of contact (24%).

Retention Dimensions

The incoming students were asked five questions pertaining to their commitment to UW-River Falls and CAFES, and their level of participation in campus activities. We expect that a student’s level of attachment to and expected participation in campus life might influence their commitment to remain at UW-River Falls until they graduate.

In 2012, more than 8 out of 10 students either agreed (27%) or strongly agreed (58%) that UW-River Falls was their first choice of colleges. Only 7% of the incoming class of 2012 either disagreed or strongly disagreed that UW-River Falls was their first choice of schools. This proportion has remained relatively steady over the past 6 years. Students from Wisconsin were significantly more likely to identify River Falls as their first choice of colleges, environmental science majors were significantly less likely to do so.
In 2012, 79% of respondents agreed or strongly agreed that they will stick to their major. This is slightly higher than the proportion for incoming classes in prior years. As has been true in previous surveys, Ag Business majors are significantly less certain they will stick with their major than students in other programs. This year, Environmental Science and Ag Studies majors were also significantly less likely to say they will stick with that major. In contrast, Ag Education majors were significantly more likely to say they will stick with their declared major. Students from Wisconsin were slightly more likely to be sure they will stick with their current major.
Figure 8 indicates that until this year there has been a slight downward trend in the proportion of incoming students who “disagree” or “strongly disagree” that they will transfer from UW-River Falls.

Students were asked if they were involved in high school activities, including sports, clubs, and volunteer activities. Studies have shown that students who participate in clubs and other extracurricular activities are more likely to be retained at college. Implicitly, we are assuming that if our incoming students were active in high school extracurricular activities, they will also be active at UW-River Falls. More than six out of ten students agreed or strongly agreed that they were involved in extracurricular activities in high school. The proportion actively involved in extracurricular activities seems to be declining modestly over time. Students who grew up on a farm were 20% more likely to be involved in activities in high school. This high number may, possibly, be attributed to activities such as 4-H and FFA. Students in Environmental Science indicated that they were not as involved in high school activities.
Finally, students were asked if they planned to include an international experience during their time at UW-River Falls. Analysis indicates that students majoring in crops and soils, as well as ag studies, are significantly less likely to include an international experience during their time at UW-River Falls but that animal science and horticulture students are more likely to be planning an international experience.
Conclusions

The results from the 2012 New CAFES Student Survey generally align with those from previous years. The data shows that CAFES attracts a larger proportion of students from Wisconsin and draws students from both farming and non-farming backgrounds.

Animal Science continues to expand its dominance of student numbers in the college. There is a risk associated with having one major account for virtually all of the growth in the college.

This data confirms that word of mouth remains the most influential factor for students coming to UWRF. What students hear from their family and friends, as well as what they believe to be our quality programs are the dominant factors in their decision making process. More and more students are gathering information about CAFES and UWRF from the website but this information is not particularly influential for students in terms of where they choose to go to college.

This year, only 1 of the 353 students reported having no contact with the university prior to their arrival on campus. The university has, thus far, been successful in getting information out to prospective students.

After a decline over the past few years in new students indicating River Falls was their first choice of colleges, there was an increase of five percent in 2012 compared to 2011. Most students also consider themselves to be strongly committed to their major.

In sum, the results of the 2012 survey are not dramatically different than in previous years but do suggest a few potentially troubling trends.

Friends family and teachers at UWRF
Friends have informed me it's a good program.
Friends telling me just how good the school was and the small classes
Friends that graduated from here
Friends that have gone or are going here
Friends that have gone to school here and really liked it
Friends that have previously gone here
Friends who go to UWRF highly recommended that I apply
Friends, website, campus visits
Friends/alumnus of the universities
From information I have received and friends that have gone here
Graduates of CAFES
Had a friend that was in the equine management program/researched on website
Heard from friends about UW-River Falls and wanted to go to a place for pre-vet close to homes
Hearing about the program
Highly recommended from previous students here and also the veterinarians in my hometown
I had a part time job at a vet clinic where a doctor was an alum and she strongly recommended it
I have been shadowing a D.V.M. for 2 years now. He received his undergraduate from UWRF. He got me stuck and passionate on the idea of coming here
I have heard from many people that River Falls has a very good animal science program
I have heard from previous teachers, that UW-River Falls programs have a good reputation.
I know lots of people who have graduated from UWRF. All speak highly of the school.
I know others in the filed talking about it.
I talked with a local vet.
I was influenced by the my experience in the field with people that went to UW-River Falls.
Internet and family friends.
Internet, brochures, family/alumni.
Internet, experience of friends who are alum, friends who are current students.
I've only heard good things about River Falls from friends and family.
Just what I have heard from others.
Lots of good things to say about equine programs.
Mailings, talking with people who have gone here before.
Mainly talking to people that go here.
Many friends loved it here.
Many people have told me about the Animal Science program and its reputation.
Meeting with advisors and getting feedback from family who have pushed me towards higher education.
My AG teacher/FFA advisor told me about it, and loved it, as well as friends.
My aunt and my grandfather went here many years ago and they said this was the best place to start.
My brother said that UW-River Falls has good programs.
My family and friends said it would be good for my program I want.
My family friends went here and said it was great.

My family member who attended here.
My friends who attended UWRF informed me about the programs.
My grandfather came here.
Mailings/brochures info on web site.
My guidance counselor and local veterinarians told me about the programs and experience there.
My parents.
My parents both went and graduated from UW-River Falls and told me about the great programs here.
My parents who both graduated from URF. Also the reputation for strong agriculture programs.
My parents, the website, and other people's experiences.
Older students.
Online, campus visit, reputation.
Opinions of others and came here to see the campus.
Other alumni studied here and enjoyed it here at URF.
Other older classmates (from cross country), price, quality, but not expensive.
Other peoples input on the science programs at UW-River Falls.
Other people's recommendations.
Parent.
Parents talking about it and the URF website.
Past students.
Peers, internet.
People I've talked to enjoy this school.
People say it's a great program.
People talking about their great Animal Science programs.
People that have attended URF.
People who have gone here before and the website have given me lots of information.
• People/brochures
• People's word
• Programs available, UWRF graduates
• Recommendation from Ag Teacher and counselor and the reputation of a good Horticulture program
• Relatives and the cross country team
• Reputation in the AG sector of education. I also know past participants in your programs that recommended attending
