Undergraduate Stipends & Expenses Grant Competition

The Undergraduate Stipends & Expenses Grant is intended to assist in covering expenses necessary to conduct research. Funds are available to purchase undergraduate research supplies including, but not limited to, small equipment, books, software, disposable lab supplies, instructional materials, and printing; to provide Financial Aid awards for undergraduates to compensate for time allocated to their projects; and to support undergraduate travel to conduct their research. Note that dissemination events (conference presentations, etc.) are funded through Falcon Travel Grants. The USE Grant is solely for monies to conduct research.

Applications for these competitive grants are welcome from undergraduates in all colleges and disciplines. Grant applications can be for individual projects or collaborative projects, and in all cases should be student-authored, with supervision and guidance from the faculty mentor(s) who will be directing the research. In the understanding that good faculty mentorship requires regular meetings and ongoing leadership throughout all phases of a research project, from initial conception to dissemination, faculty mentors receive a companion mentorship award payable on the student researcher’s completion of the project.

Individual Undergraduate Research Projects:
Researchers conducting an individual project are eligible to apply for up to $1500 in S&E and/or Financial Aid to support their research project.

- **Research Supplies and Expenses**
  - Award amounts: up to $500, $1000, or $1500 in S&E payable either to the mentor’s department for the purchase of URSCA supplies or to cover departmental outlays for URSCA expenses, or directly to the undergraduate responsible for purchasing. Where possible, mentor departments should complete all purchasing. In all cases, payments are receipt-based and require timely submission of receipts. An itemized budget is also a required element of the USE Grant application.
  - Funds may be used to purchase undergraduate research supplies including, but not limited to, small equipment, books, software, disposable lab supplies, instructional materials, printing, and travel to conduct research. Students should include a line for presentation poster.

- **Financial Aid Award**
  - Individual researchers may request research support for their time while conducting the research project in the form of a Financial Aid award of either $500, $1000, or $1500. Initial Financial Aid USE Grant payments are disbursed within eight weeks of award date.

Collaborative Undergraduate Research Projects:
Researchers in a collaborative team project are eligible to apply for a total of up to $2000 in S&E. URSCA teams may also apply for Financial Aid stipends for each individual team member in $500 increments to support their research project. There are no limits on the number of undergraduates that can participate on a collaborative research project; however, awards in the collaborative undergraduate research category are capped at $3000.

- **Research Supplies and Expenses**
Award amounts: up to $500, $1000, $1500, or $2000 in S&E payable either to the mentor’s department for the purchase of URSCA supplies or to cover departmental outlays for URSCA expenses, or directly to the undergraduate(s) responsible for purchasing. Where possible, mentor departments should complete all purchasing. In all cases, payments are receipt-based and require timely submission of receipts. An itemized budget is also a required element of the USE Grant application.

Financial Aid Award
- Researchers in a collaborative team project may also request research support for their time while conducting the research project in the form of Financial Aid awards in the amount of either $500 or $1000 per team member. Initial Financial Aid USE Grant payments are disbursed within eight weeks of award date.

Mentor Awards:
Faculty/staff mentors who direct successful individual or collaborative USE Grants receive funds for their own research or professional development. Mentor awards will be paid on a 1-3 ratio based on the undergraduate proposal award.

Additional Terms and Conditions:
- **Qualifications**
  - Application to the USE Grant does not guarantee funding.
  - Undergraduates may apply for up to three USE Grants per year. If funding is limited, priority will be to undergraduates who have not already been awarded a USE Grant this fiscal year.
  - Students receiving a USE Grant must be degree-seeking UWRF undergraduates.
  - Acceptance of a USE Grant award is an agreement on the part of all undergraduate recipients to present findings on-campus at the UWRF Fall Gala or Spring URSCA Day within one year of the award.
  - Brief online project updates are required at the end of each term from undergraduate award recipients and their mentors.
  - All purchasing must adhere to university policy, with equipment and non-disposable materials becoming property of the mentor’s department on completion of the project.
  - Per campus guidelines for differential tuition funds, grant monies cannot be used to purchase food, beverages, or incentives for human research subjects or participants.

- **Multiple Funding Sources**
  - Students cannot simultaneously receive funding through multiple programs or credit for the same budget items and/or the same phase of a previously-funded or for-credit research project (i.e. No “double-dipping” or “double-counting”). Students may apply for a USE Grant if they are requesting funding for a new phase of a previously funded project, or if they wish to expand and further develop a previously funded project, or a project for which they have previously received course credit. In such a case, the student’s research question, methodology, timeline, and budget should reflect the way(s) in which this project is new or different from what they did before. Students applying for funding through the Undergraduate Research, Scholarly and Creative Activity Office are required to disclose funding (and applications) from all other sources, including McNair, NSF, and the UWRF Summer Scholars Program.

- **Notification of Award**
  - The Office of Undergraduate Research, Scholarly and Creative Activity will notify award recipients, typically within 6 weeks of the grant deadline.

Falcon Promise funds the Undergraduate Stipends and Expenses Grant competition. Falcon Promise is a differential tuition initiative that invests student funds for full-time UWRF undergraduates to participate in Undergraduate Research, Scholarly, and Creative Activities (URSCA). The URSCA Council, in a blind review process, evaluates all proposals. Projects supported by this program should exhibit the potential for scholarly publication, presentation at a conference, or creative performance. The purpose of URSCA is to foster collaborative faculty-student research, enhance student learning and promote the culture of research, scholarship, and creative activities at UWRF.
